

Health World has partnered with The Allstate Foundation to facilitate in-school Drive it Right programs throughout the region. Drive it Right is designed to help your entire school community learn about and address the important issues that surround teen driving. This powerful curriculum is available **FREE OF CHARGE** through the generous support of The Allstate Foundation.

The overarching goal of the program is to empower teens to reverse unsafe teen driving trends with their own ideas, influences and creative thinking!

## DESIGNED TO FIT YOUR SCHOOL

We realize each school will use the program in a way that best fits their school structure and student population. To assist in reaching as many students as possible, Health World educators are available to present 45-minute programs as part of any and/or all of the following:

- An all-school assembly
- Drivers education programs
- Student government/school clubs
- Classroom Presentations (i.e. during P.E. classes)
- Web-streaming programming
- Presentations to booster clubs

In addition to facilitated programming, Allstate provides the entire Drive it Right curriculum to include DVD, License to Drive materials, tips for creating a Drive it Right pledge, and posters. Health World will monetarily support class and/or club projects that provide an application depicting a creative Teen Safe Driving Campaign within their school.

## DRIVE HOME THESE IMPORTANT MESSAGES!

The program's License to Care component is designed to be reproduced and sent to parents through PTA/PTO, Booster Clubs, School Website and/or Newsletters. Class assignments will require student reflection and parent/teen review of the Parent-Teen Driving Contract.

Let us help your school start the conversation TODAY!
