

Talk to Your Little Monsters about Safety!

Keep Halloween safe and fun by following these simple tips:

Let Your Lights Shine...When purchasing electrical decorations, make sure to shop at a reputable retailer and look for the UL Mark. Do not plug in more than the recommended wattage. Use special, heavy duty extension cords for high wattage decorations.

Inspect Decorations with Wicked Care...Inspect all of your electric lights and decorations for damage or wear. Consider replacing damaged light strings with energy-efficient LED lights.

Take Caution with Candles...Candles, especially in Jack O'Lanterns, should be off the ground and out of children's reach.

Protect Your Ghosts and Ghouls from Going Bump in the Night...Halloween costumes should allow full movement for your kids. Check to ensure that costumes don't restrict your children's vision, and instruct them to watch out for tripping hazards, such as cords.

Say Boo! To Unsafe Costumes...Purchase or make costumes out of flame-resistant materials such as nylon or polyester. Remind your child to stop, drop and roll if his/her costume catches fire. Choose costumes that are lighter in color and/or attach reflective material. Remember: flashlights help children to see and to be seen!

Keep Hungry Monsters from Feeding...Never let your kids eat Halloween candy before you inspect it -- in a lighted area, preferably at home.
