

Health World has partnered with The Allstate Foundation to facilitate in-school Drive it Right programs throughout the region. Drive it right is designed to empower your entire school community to make healthy and positive choices especially related to safe teen driving, whether students are the driver or the passenger. This powerful curriculum is available **FREE OF CHARGE** through the generous support of The Allstate Foundation.

The overarching goal of the program is to empower teens to reverse unsafe teen driving trends with their own ideas, influences and creative thinking!

## DESIGNED TO FIT YOUR SCHOOL

We recognize the importance of flexible program scheduling and the need to link program content to state learning standards. The Drive it Right program meets thirteen Illinois State Learning Standards! To reach as many students as possible, Health World educators are available to present 40-minute programs as part of any and/or all of the following:

- An all-school assembly
- Classroom Presentations (i.e. during P.E. classes)
- Student government/school clubs
- Web-streaming programming

In addition to facilitated programming, Allstate provides the entire Drive it Right curriculum to include (DVD, License to Drive materials, tips for creating a Drive it Right pledge, and posters).

## PARENTS CAN HELP DRIVE HOME THESE IMPORTANT MESSAGES!

Parents have a license to care! This information is designed to be reproduced and sent to parents through PTA/PTO, Booster Clubs, School Website and/or Newsletters. Optional class activities will allow for student reflection and parent/teen review of the Parent-Teen Driving Contract that the teens may eventually sign.

Let us help your school start the conversation **TODAY!**
